

Automation for a Changing World

Delta Compact Modular Mid-range PLC AS Series

www.deltaww.com

Flexible, Smart, Friendly - The Best Choice for a Controller of Automated Equipment

AS Series

The AS Series Compact Modular Mid-range PLC is a high performance multi-purpose controller designed for all kinds of automated equipment. It features Delta's self-developed 32-bit SoC CPUs for enhanced execution speed (40k steps/ms) and supports up to 32 extension modules or up to 1,024 inputs/outputs. The AS series provides accurate positioning control for up to 8 axes via CANopen motion network and 6 axes via pulse control (200kHz). It is widely used in diverse automated equipment such as electronics manufacturing, labeling, food packaging, and textile machines.

The AS Series Controller is equipped with CANopen and EtherNet/IP network communication for high-speed data transmission. The professional yet simple editing software ISPSoft delivers quick hardware and network configuration with built-in function blocks for different industries. It also provides multi-layer password protection for enhanced system security.

The AS Series adopts a rackless design and patented DIN rail clips for fast vertical module installation. The simple shape and dark gray exterior of the AS series help resist stains and dirt in harsh industrial environments.

High Efficiency Computing

- Advanced CPU performance
- Optimized execution efficiency
- Optimized I/O update rate
- Permanent data backup, no battery required

Accurate Axis Control

- Delta CANopen positioning control
- Simple control instructions
- High-speed pulse positioning control
- High-speed counter

Simple Installation

- Easy installation process
- Convenient grounding protection
- Screwless installation procedure
- Loose-proof clip-type terminal block

Industrial Network Solution

- EtherNet/IP solution
- Remote I/O solution
- Serial communication solution

Programming and Diagnosis Functions

- Modular programming structure
- Convenient editing environment
- Easy hardware configuration and parameter setting
- Complete setting tools
- Multiple password protection

Models and Specifications

- CPU
- AS Series I/O modules
- High-density modules and accessories
- Dimensions
- Ordering information

High Efficiency Computing

Delta's self-developed AS Series CPU provides 32-bit high-performance computing. As the core of a high-efficiency controller, it helps increase productivity and adaptability to demanding equipment.

Advanced CPU Performance

▪ High speed execution up to 40k steps/ms

(Condition: 40 % LD instruction / 60% MOV instruction)

- Max. number of inputs/outputs: 1,024
- Program capacity: 128k steps
- Data registers: 60k words
- Max. extension ability: 32 modules

LD instruction 25 ns

MOV instruction 0.15 µs

Floating point operation instruction 1.6 µs

Trigonometric function instruction 3.5 µs

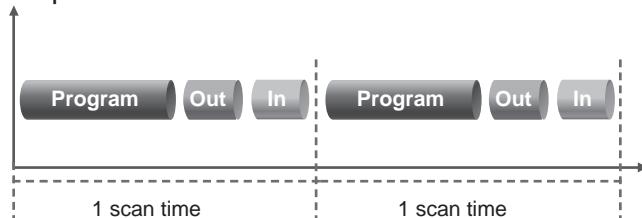

Optimized Execution Efficiency

■ General Scanning Method

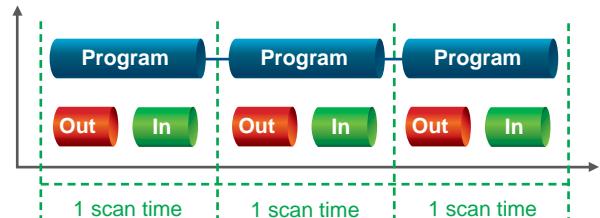

Standard simplex scanning which sequentially goes through instructions by fixed schedule operation (e.g. I/O update).

It significantly affects overall execution speed.

■ AS Series Scanning Method

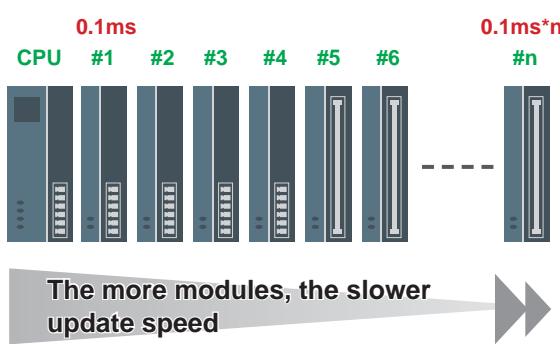

Fixed schedule operations will be automatically processed by CPU background program when scanning starts. It significantly enhances execution speed.

Optimized I/O updates

■ Common in the industry: PLC module bus update via serial communication

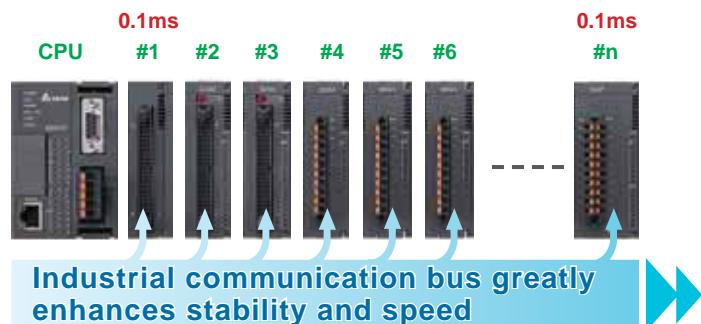

- General serial communication: the signal is sequentially sent from the 1st module to the last module. The more modules the longer I/O update time it takes.

■ AS Series: PLC module bus update via parallel communication

- Industrial communication: the signal is sent via parallel communication. The I/O update time is not significantly prolonged even with more modules.

Industrial communication bus greatly enhances stability and speed.

Permanent data backup, no battery required

■ Non-volatile memory material for data backup

	PLC power off
PLC programs	permanent backup
Latched area	permanent backup

■ Lithium button battery for Real Time Clock (RTC) function

	PLC power off
RTC	keeps accurate time

Accurate Axis Control - Positioning Control Solution

■ Positioning control - Delta's CANopen Control

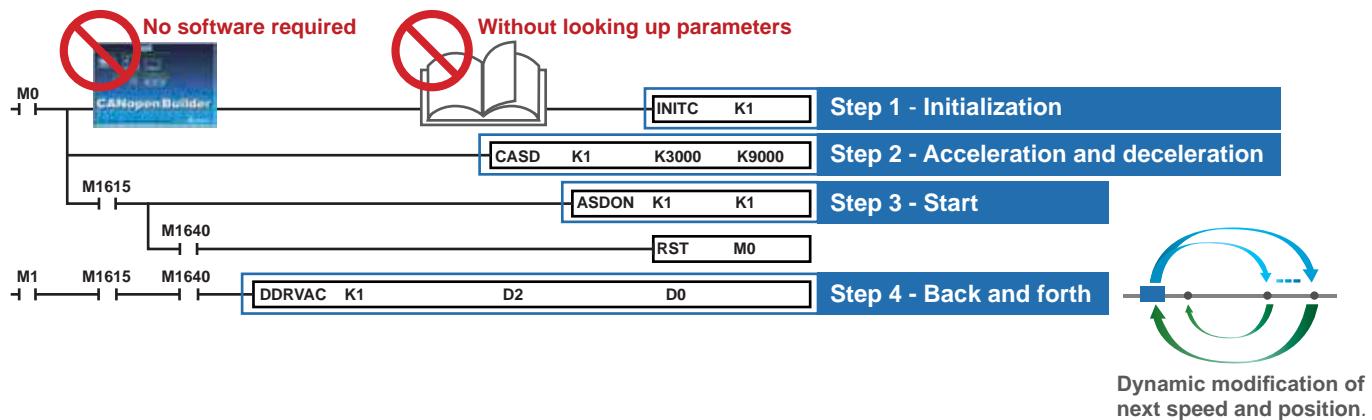

- Delivers up to 8-axis CANopen positioning control with AS-FCOPM communication card
- Fast positioning configuration in one initialization instruction without building CANopen data exchange table
- Batch download programmable servo drive parameters avoids risk of loss
- Axis control by instructions provides easy maintenance and high PLC program readability

■ Simple control instructions for AC Servo Drive ASDA-A2 Series

- | | |
|---------------------------------------|---------------------------------|
| ▪ Initialization: INITC | ▪ Constant speed control: PLSVC |
| ▪ Relative positioning: DRVIC | ▪ Absolute positioning: DRVAC |
| ▪ Read and write parameter: COPRW | ▪ Start / Stop: ASDON |
| ▪ Acceleration and deceleration: CASD | ▪ Homing: ZRNC |

ASDA-A2 back and forth motion control in 4 steps

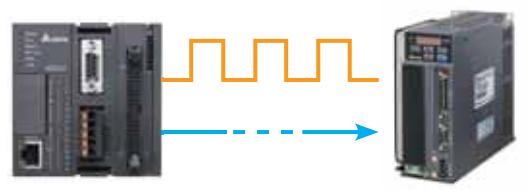

■ Positioning control - high-speed pulse

- AS332T-A / AS332P-A transistor CPU: 6 axes (or 12 channels) 200 kHz
- AS324MT-A differential CPU: 2 axes 4 MHz + 4 axes 200 kHz
- Supports positioning planning table for fast positioning planning and path simulation
- Choose any given 2 axes for linear and arc interpolation

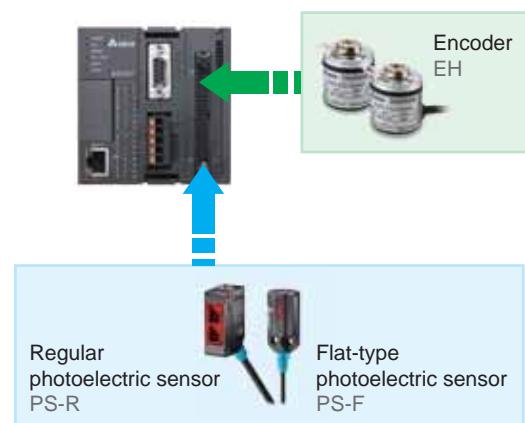

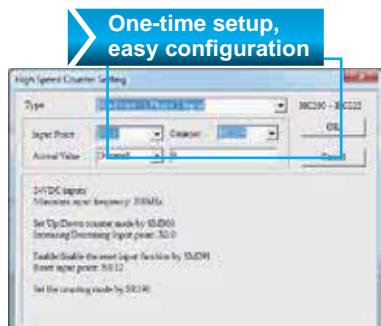

* Note: Please refer to the product specification section (P.23) for more information on CPU models

■ High-speed counter

- Real-time high precision monitoring:
AS332T-A / AS332P-A transistor CPU: 6 channels 200 kHz
AS324MT-A differential CPU: 2 channels 4 MHz / 4 channels 200 kHz
- Up to 16 external input interrupts
- High-speed counter setting tools

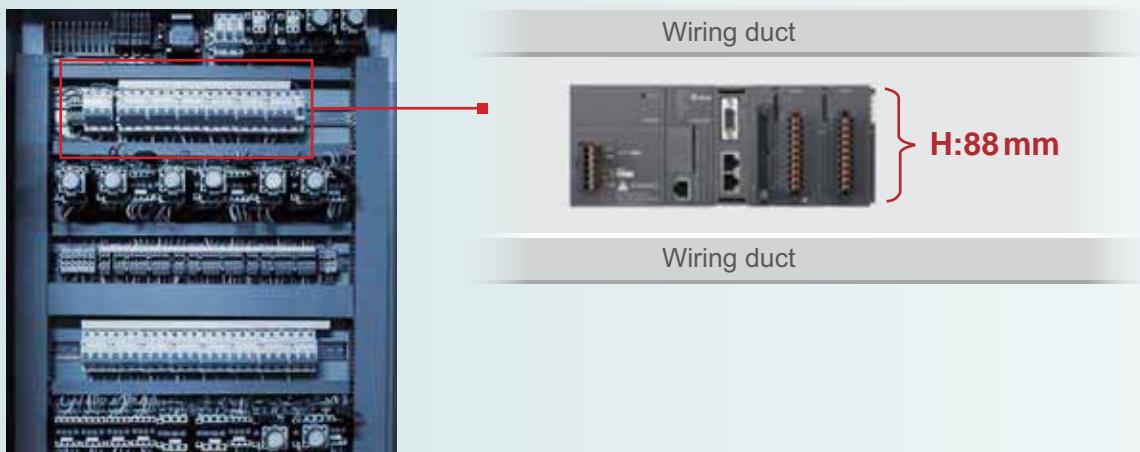

* Note: Please refer to the product specification section (P.23) for more information on CPU models

Simple Installation

▪ Easy installation design

- Space-saving design suitable for installation in control panels

▪ Rackless Din-rail installation

- Delta patented design

➤ Robust slot and clip interlocking design

▪ Fast disassembly

- Release the clip ring to easily take out the module from the front without moving adjacent modules

▪ Simple installation process

- Press the clip rings and push the module to the desired position until hearing a "click" to finish installation

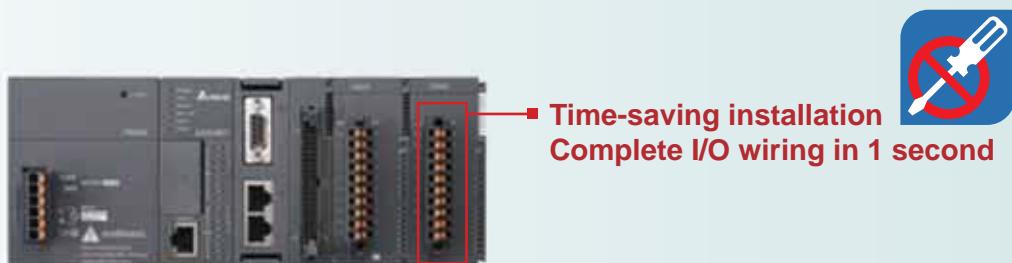

▪ Convenient grounding protection

- Install on Din-rail: CPU module and expansion modules can be installed directly on Din-rail without backplane
- Install with screw: pull out the installation clip ring and directly install it on the panel
- Both methods are equipped with ground protection

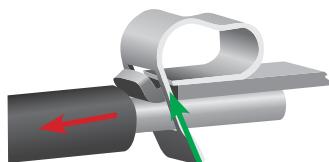

▪ Screwless and time-saving installation

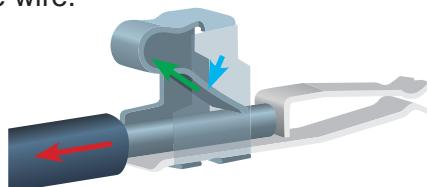

▪ Robust Loose-proof spring clamp terminal block

- In commonly used spring clamp terminal blocks, the clamping force is determined by the spring material, which decreases with the aging of the spring.

The green arrow is the clamping force, and the red arrow is the pull-out force.

- The AS Series adopts the full-covered spring clamp design that enhances the clamping force. When the wire is pulled-out (red arrow) and the spring moves up (green arrow), a downward force is generated (blue arrow) to clamp the wire.

Industrial Network Solution

EtherNet/IP Solution

The open industrial Ethernet communication protocol for real-time control and data collection

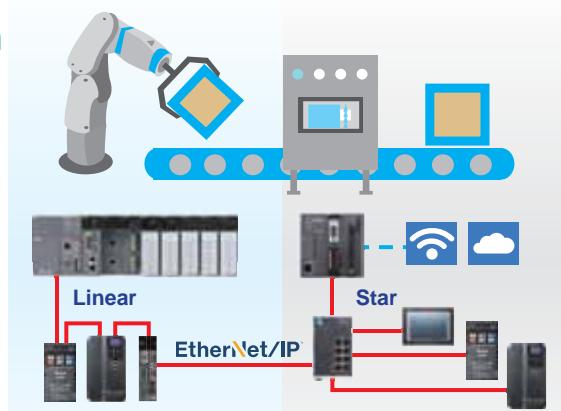

EtherNet/IP

- Max. connectable slave stations: 32
- Max. data transmission: 500 bytes/connection
- Performance: slave station data update in 1 scan time

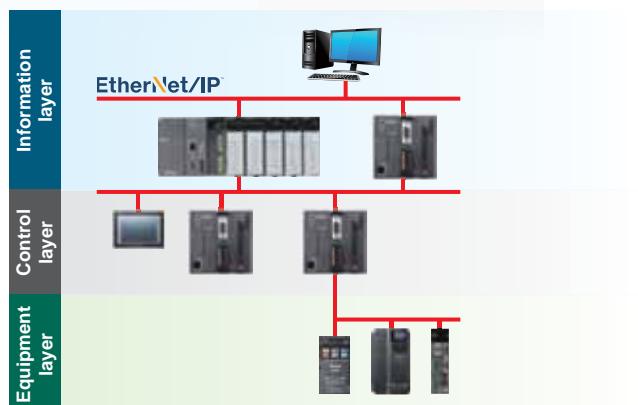

▪ Flexible network system configuration

- Supports star, linear network topology for fast expansion and management on production lines
- Compatible with IT network. No independent network or IT technician required
- Combines with Delta IES solution to construct IoT for more automation applications and industrial 4.0 upgrades

▪ One cable, one network

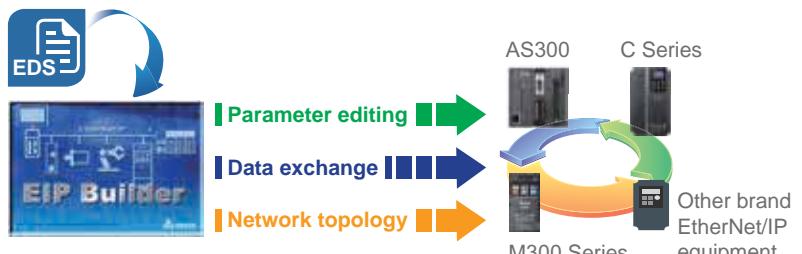

- Complete Delta EtherNet/IP solution connects different equipment via Ethernet cable and simplify cable preparation
- Replaces traditional 3-layer industrial network structure with seamless connection via 100MB high-speed network
- Complete industrial network diagnosis for shortened debug time

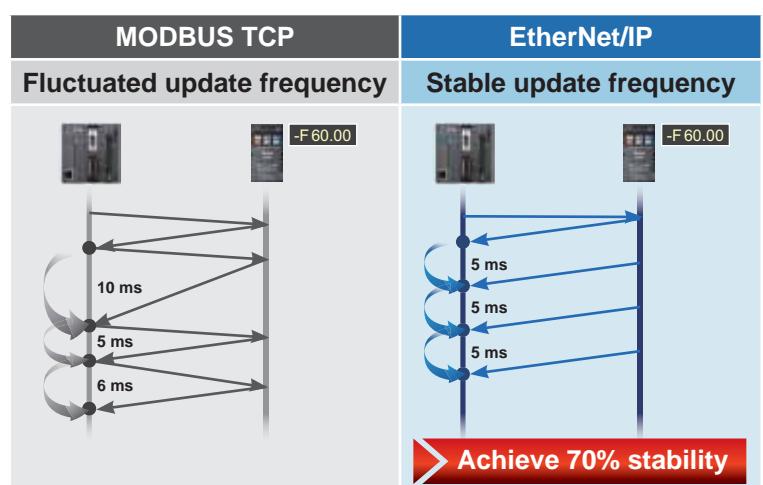

■ Software integration

- Consistent data exchange interface shortens learning time with fast system configuration
- Provides Delta equipment parameter list for quick parameter matching without looking into detailed manual
- EDS File provides quick connection with EtherNet/IP products of other brands

■ Accurate data update

- Provides real-time cyclic and acyclic data transmission and define data priority between equipment
- Establishes multiple CIP links and define different register priority with one piece of equipment
- Executes data update based on user RPI. Updates all slave station data in one scan time
- 70% better stability compared with traditional MODBUS TCP

EtherNet/IP Software EIP Builder

The screenshot shows the EIP Builder software interface with several windows:

- Network Mapping Window:** Shows a visualized network mapping of EtherNet/IP devices connected via a bus.
- Parameter List Window:** Displays a table of parameters for Delta's products, including device name, module name, port, IP address, and data exchange setting.
- Equipment Description Management Function Window:** Shows a tree view of equipment categories like Communications Adapter and Programmable Logic Controller.
- Data Exchange Table Window:** A table for configuring data exchange via table blanks filling.
- Data Input/Output Corresponding Table Window:** A table for connecting equipment editing on corresponding parameters.
- Data Exchange Diagnosis Window:** A table showing data exchange status and error codes.
- IP Management Function Window:** A table for managing all IP addresses of EtherNet/IP products.

Visualized Network Mapping

- Direct network planning

Network Mapping Diagnosis

- Real-time network status and device indicators display

Parameter List

- Built-in parameter list of Delta's products

Data Exchange Table

- Data exchange via table blanks filling. PLC programming is not required

Data Input/Output Corresponding Table

- Preset data exchange on corresponding parameters
- Connecting equipment editing on corresponding parameters

Data Exchange Diagnosis

- Data exchange status and error codes

Visualized Product List

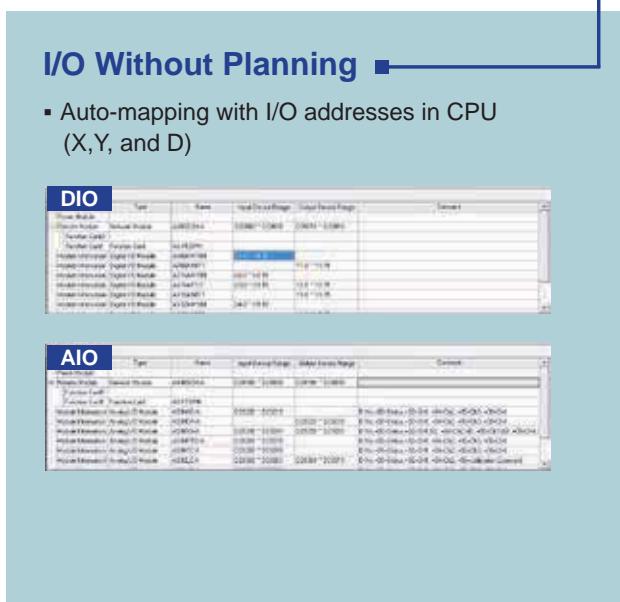

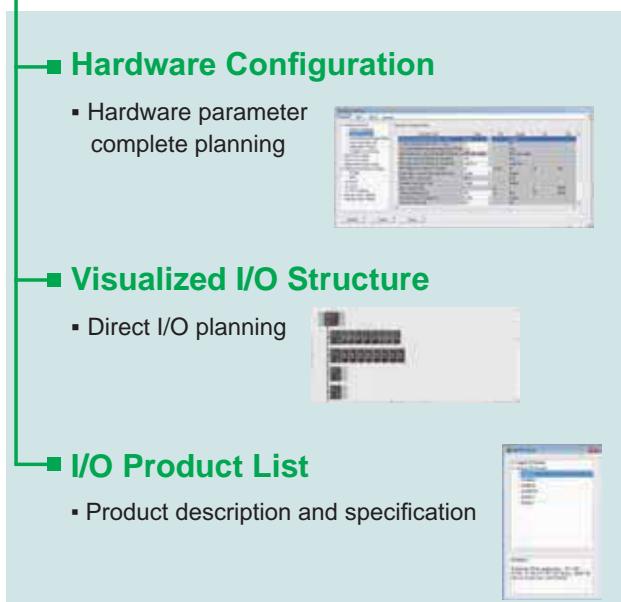

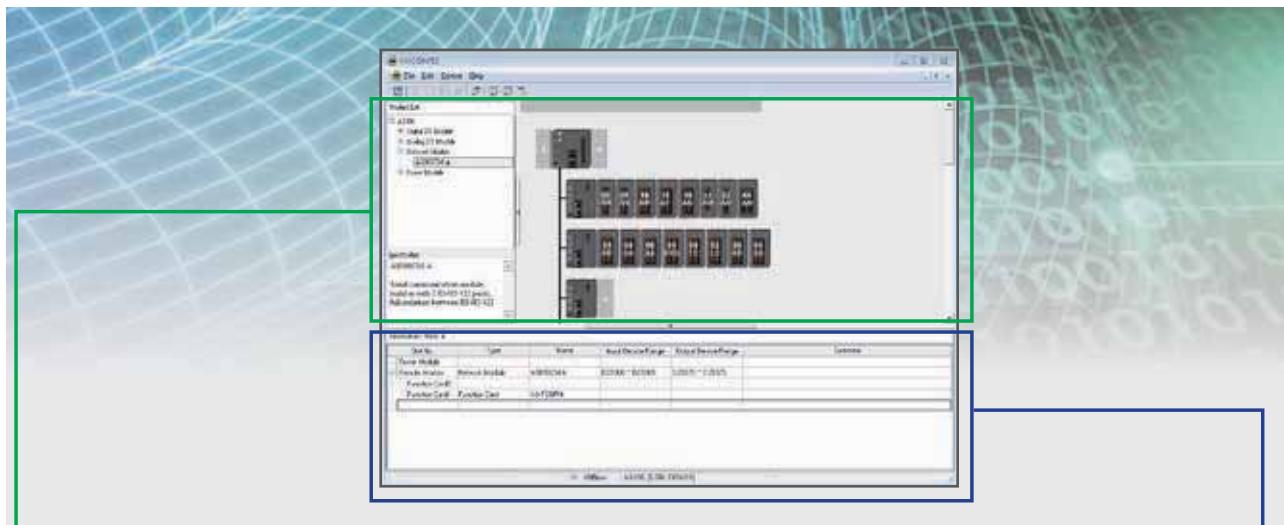

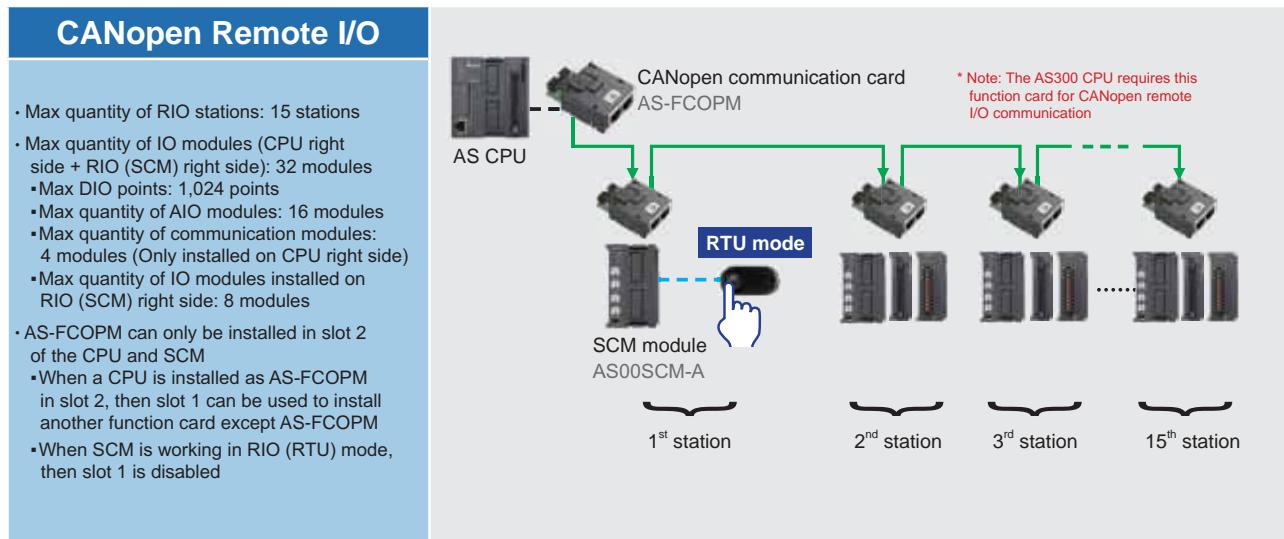

- Visualized equipment selection

IP Management Function

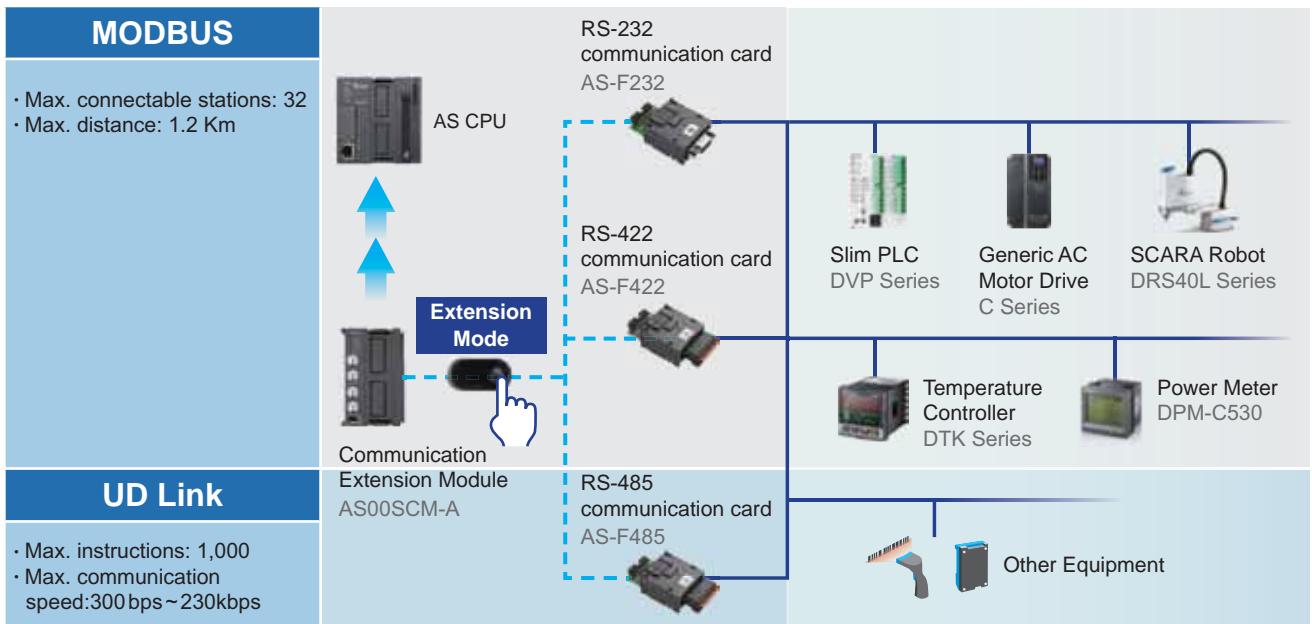

- Configure all IP address of all EtherNet/IP products

Equipment Description Management Function

Remote I/O Solution

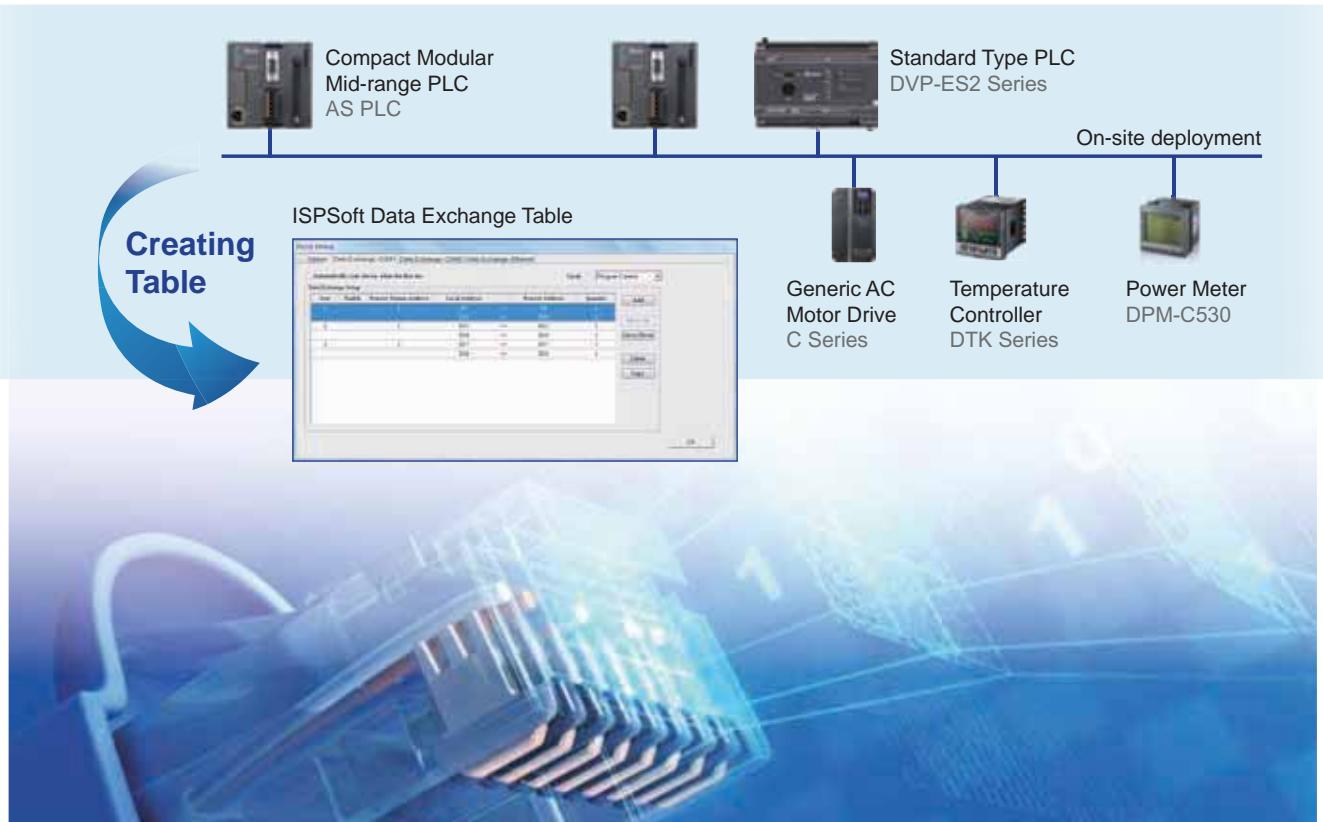

Serial Communication Solution

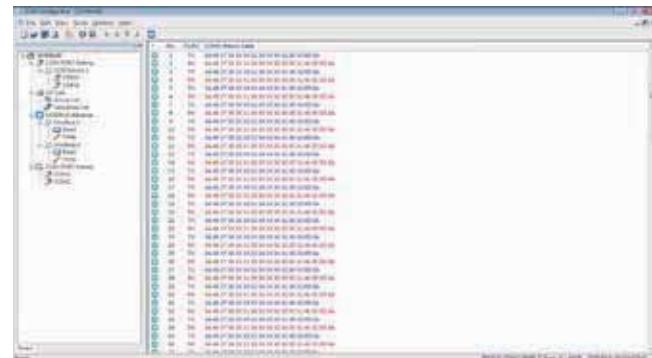

■ MODBUS Mode

- Easy data exchange configuration

■ Real-time history log diagnosis

- AS00SCM stores 2k bytes history log. SCMSoft directly displays the log for real-time communication status monitoring with no additional monitoring software required

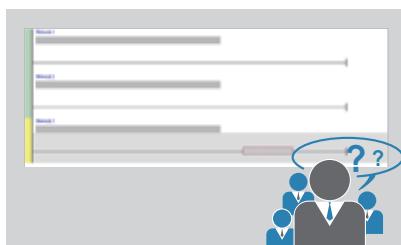

■ UD Link Mode (User-defined)

- Easy connection to end equipment of special communication protocols

Traditional programming structure

Instruction receiving, accessing, editing, transmitting, sequence control

Connection to end equipment of special communication protocols

- Editing the transmitting/receiving packets via SCMSoft. Format exchange and checksum calculation via AS00SCM
- Packet content auto-combination for logic control in PLC, reducing PLC program complexity
- Max. 1,000 transmitting/receiving packets

*	Packet No.	RX Packet Name
1	1	RX Packet1
2	2	RX Packet2
3	3	RX Packet3
		RX Packets

*	Packet No.	TX Packet Name
1	1	TX Packet1
2	2	TX Packet2
3	3	TX Packet3

No.	Class	Format	Segment View
1	Message Constant	ASCII	"abcd"
2	Address Variable	Null	(R/D Register [4]), 4)
3	Message Constant	ASCII	"efgh"

Instruction execution sequence planning

User-defined communication format editing

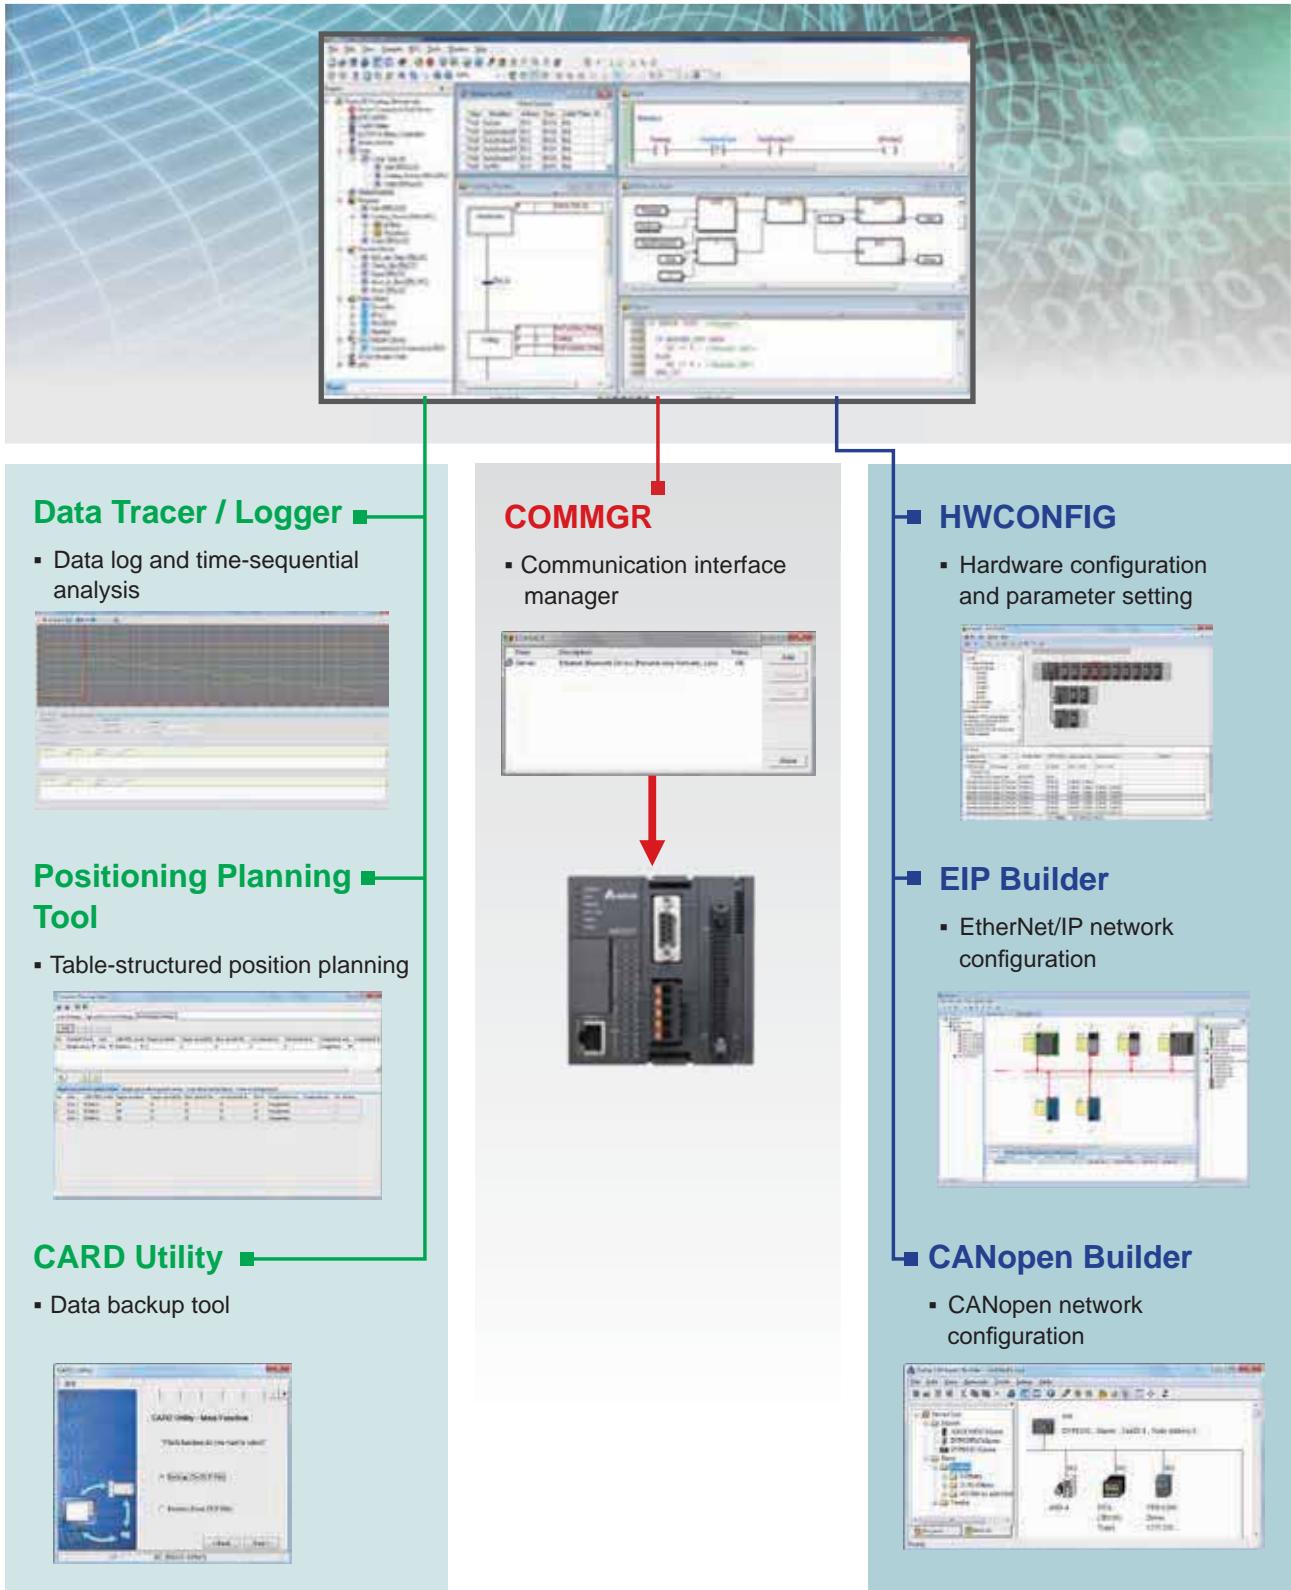

*	Command No.	Command Type	Send Packet	Recv Packet	Success	Fail	Retry	Repeat	Send Wait
1	Send & Receive		TX Packet1	RX Packet1	Goto : 1	Goto : 1	0	2	0
2	Send & Receive		TX Packet2	RX Packet2	Goto : 2	Goto : 1	0	3	0
3	Send & Receive		TX Packet21	RX Packet3	Goto : 3	Goto : 1	0	4	0
4	Send & Receive		TX Packet25	RX Packet4	Goto : 4	Goto : 1	0	5	0
5	Send & Receive		TX Packet28	RX Packet5	Goto : 5	Goto : 1	0	6	0

Programming and Diagnosis Functions

ISPSoft IEC Programming Software

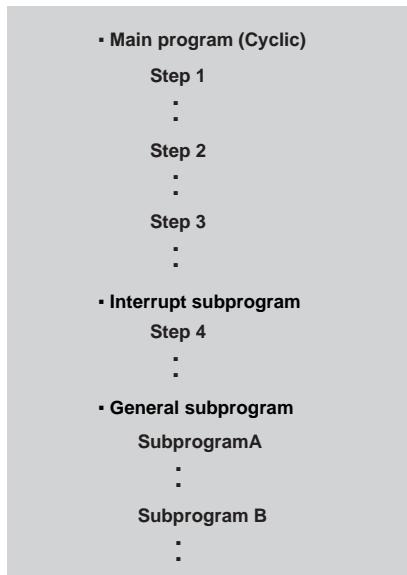

Easy operation greatly enhances efficiency

Modular Program Structure

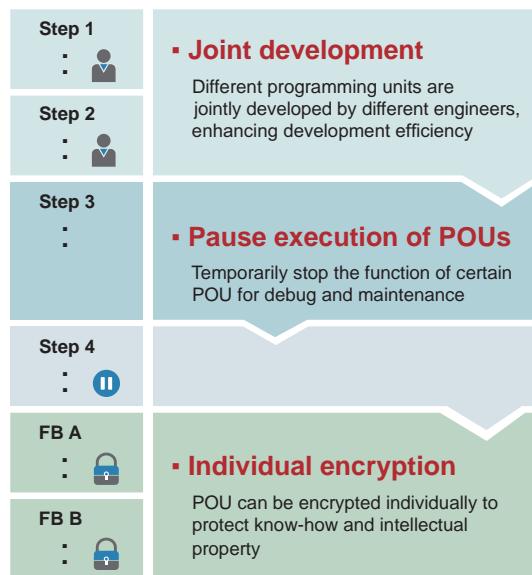

■ Traditional program structure

Errors are often found in large-scale programs under a traditional structure. It's hard to debug with increased maintenance cost.

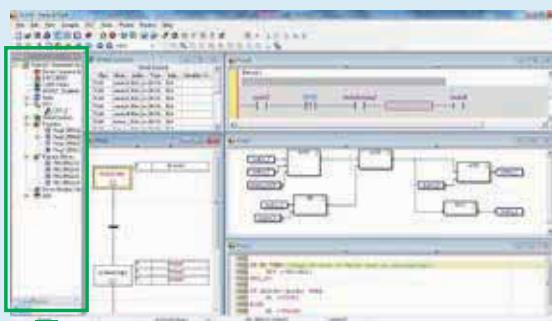

■ Modular program structure

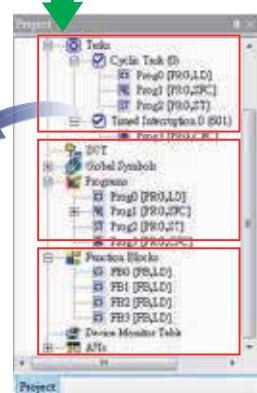

Programming organization unit (POU) enables easy management in large-scale programs with high development efficiency.

■ Modular Program Structure

Display panel of task manager

▪ Task manager

Plan the execution sequence of POUs and define the nature of the tasks (cyclical or interruptive)

▪ POU management

Manage all POUs via project tree and support POU import/export for joint development or other uses

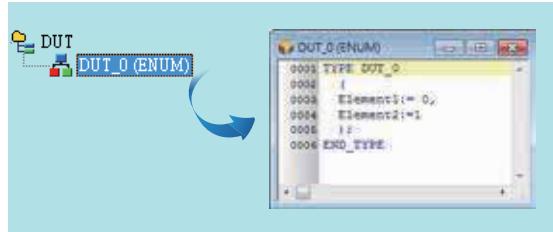

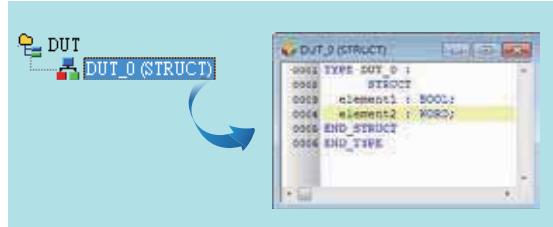

▪ User library

Built-in variety of Delta developed FBs. Users can add frequently used FBs to the library for future use.

Convenient Programming

▪ User-defined data type

In addition to basic data types, users can define structures and enumerations for flexible programming

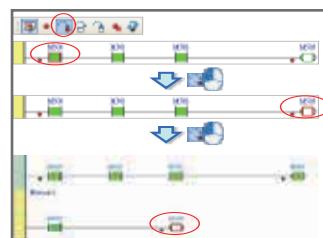

▪ On-line programming / update

Supports program editing in monitoring mode and program updates during equipment operation for convenient debugging and maintenance

▪ Debugging mode

Supports breakpoints, single step execution and other functions to enhance debugging efficiency

Various Programming Languages

▪ Support multiple programming languages in the same project

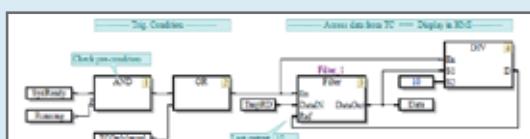

▪ Ladder Diagram (LD)

ISPSoft provides a programming interface with the widely used LD language for faster programming

▪ Continuous Function Chart (CFC)

CFC provides more advanced applications than FBD. It supports data feedback, direct display of data stream and execution sequence for motion control and sequence-centered application

Note: ISPSoft V3.01 supports CFC language

▪ Structured Text (ST)

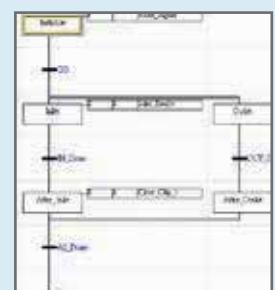

Similar programming method to advanced programming language C or PASCAL. ST provides more convenient editing for complicated expression

```
MAIN: "Initialize the Board Data"
      IF (Read and write ZONE) = 1 THEN
        ZONE := DataOut[1] - DataOut[0]
        ZONE := ZONE + 1
      ELSE
        ZONE := ZONE - 1
      ENDIF
      DataOut := ZONE
      END MAIN
```

▪ Sequential

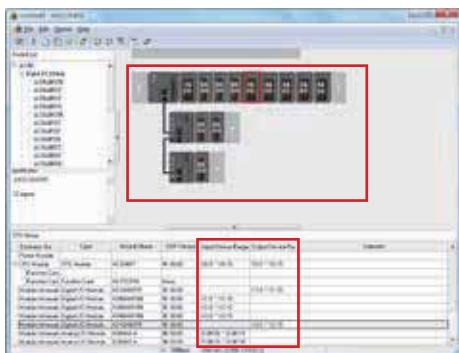

Function Chart (SFC)

Direct and easy expression for the steps in flow charts for applications that require process control

Easy Hardware Configuration and Parameter Setting

HWCONFIG

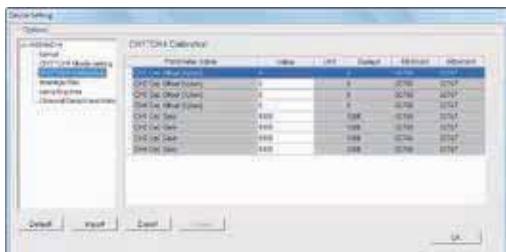

- **Graphic panel for module configuration**

Easy configuration based on connecting equipment scanning for quick setup

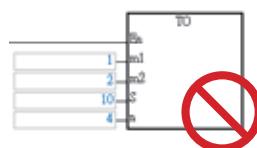

- **I/O listing**

Direct display for corresponding device addresses after configuration

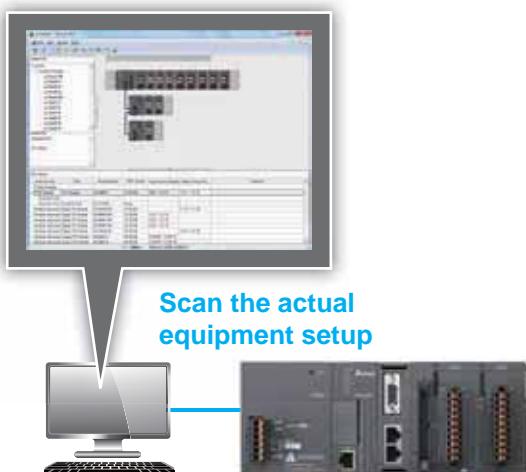

- **Parameter setting**

Fast parameter setting on controller and modules without manual reference or programming

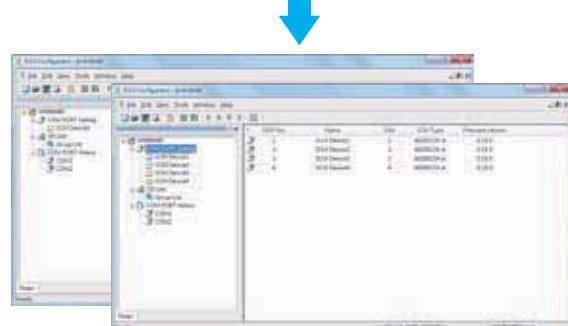

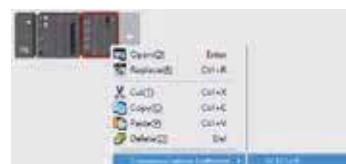

Note: Fill the table to configure module parameters quickly.
From/To instruction is not required for module initialization.

- **Module configuration method**

- **Smart module configuration**

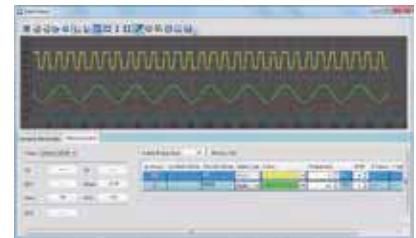

Supports an advanced planning tool for a variety of network modules

Complete Diagnosis Tools for Quick and Effective System Monitoring

Data Logger / Tracer

- Real-time
- Stable
- Precise

- **Real-time monitoring:**

High-speed tracer for fast sampling within 1 scanning cycle

- **Stable logging:**

Long-time data logger savings of up to 32,768 data records, which can be transferred to SD card

- **Precise data capture:**

Supports a variety of sampling intervals and trigger modes

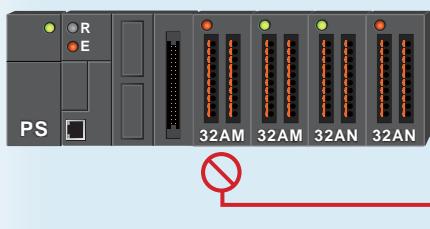

- **Convenient comparison:**

Multiple data logs in various data formats can be recorded at the same time

- **Efficient data analysis:**

Supports trend display, scaling, arrangement, merge and measurement

Real-time Module Monitoring

- **Visualized monitoring**

Direct monitoring interface provides real-time status on modules via LED indicators

- **Module comparison**

Real-time inspection of actual module settings to ensure consistency

- **Error logs**

Immediate inquiry for error messages and logs of abnormal modules

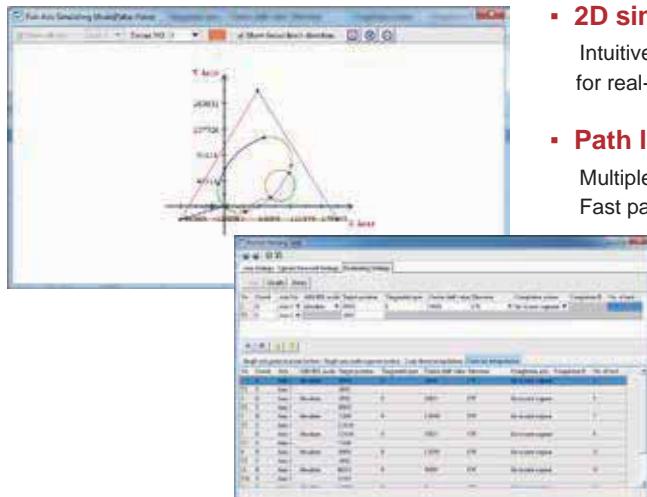

- **Module information**

Provides model name and version of current modules

Convenient Software Wizards for Effortless Planning

Position planning table

▪ 2D simulation

Intuitive 2D track simulation without complicated calculation for real-time path planning

▪ Path list

Multiple combinations for positioning modes and tracks
Fast path planning via table-structured planning

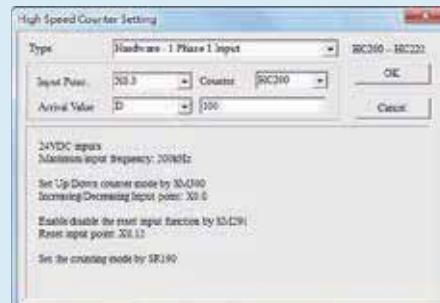

▪ Axis parameter setting

Intuitive configuration interface for easy axis parameter setting without manual reference

▪ High-speed counter setting tool

Counter index will display corresponding contact point, device and counter specification once the counting mode is chosen. Fast planning without manual reference for enhanced development efficiency.

➤ One-time setting

▪ Data backup tool - CARD Utility

Friendly guidance interface for easy data backup and restore on programs, parameters and devices

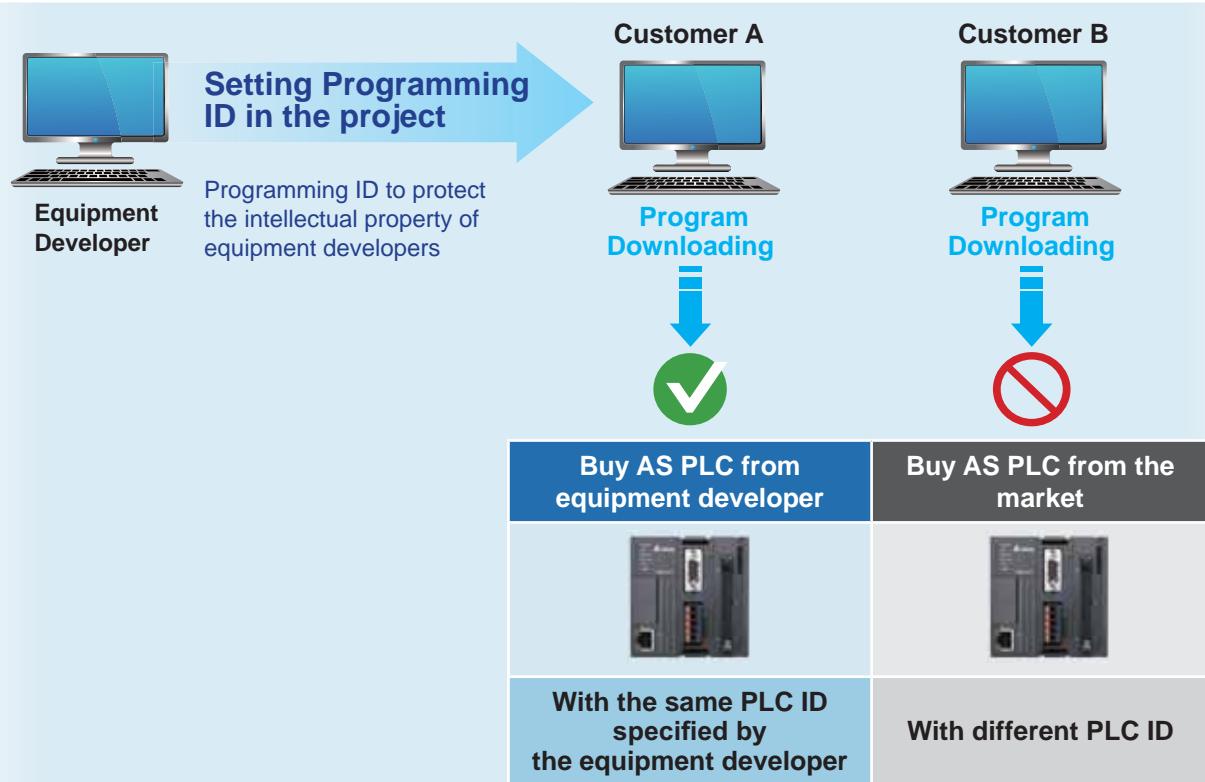

Various backup and restore methods for flexible management and operation

- Data backup to PC
- Data backup to SD card

Multiple Security Protection for Programs and Data

▪ Security: provides 6 types of program protection for data safety

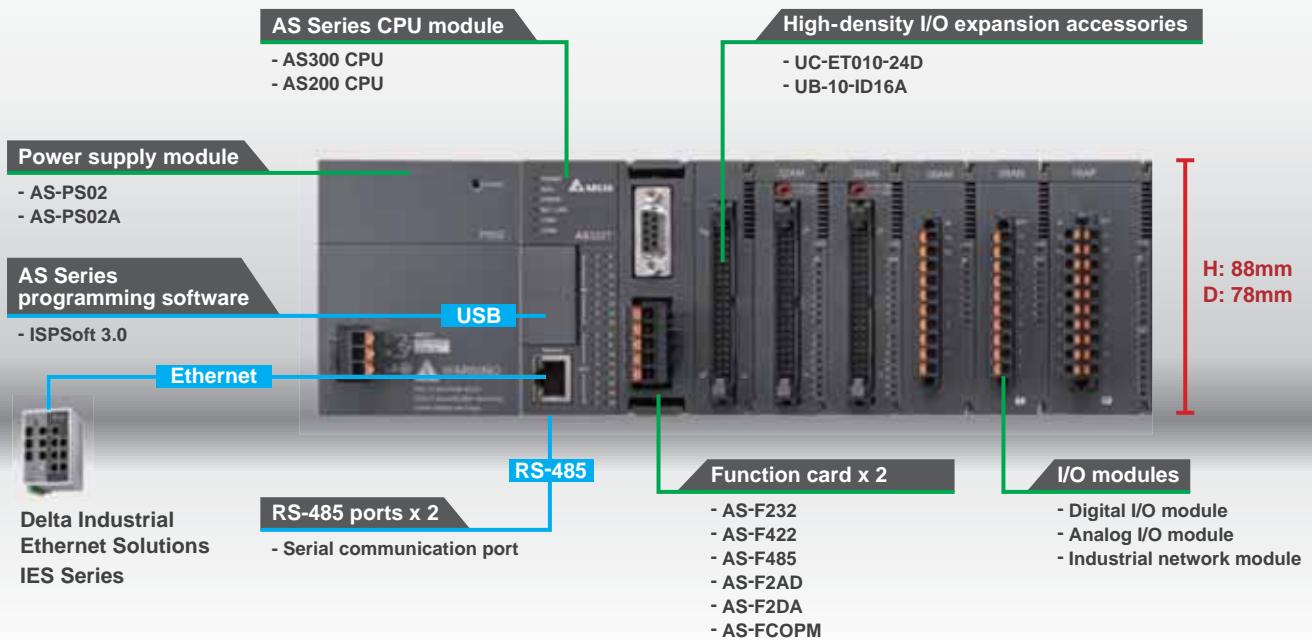

- 16-digit password protection on main program
- 16-digit password protection on FBs
- Access denial mechanism on error login
- Data upload protection function
- Verification between Project (Programming ID) and CPU (PLC ID)

- Prevention of direct copy from IC
